💼 PROFESSIONAL EXPERIENCE

Full Stack Software Engineer, Insideout Development
- Implemented Jest TTD
- I created backup backend supports to prevent loss of information using Digital Oceans as well as Weap.Io
- I created an application for ease of access for clients to access important materials
- Solved a corrupt data table in our MySQL database
- Diagnosed important bugs within the codebase that prevented users not receiving important information.

General Manager, Gorilla Car Wash/CBC Oil & Wash 🔗
- Completed 12 years of working for one company
- Promoted to multi-site general manager
- opened up 6 brand new locations in 2 different states
- Regulated company's sales, safety, and work training
- Managed repairs to reduce downtime for all 6 locations
- Assisted site managers when issues arose
- Delighted over 20,000 reoccurring members

🧩 ACCOMPLISHMENTS

- Created and maintained a complete front-end and back-end dashboard for Insideout Development clients and employees to manage and self-asset daily person-to-person interactions and what they can do to enhance those interactions for the good.
- Collaborated with a small team to brainstorm improvements and features we can add to enhance the company's growth.
